1) Stakeholder Analysis

Seven groups are affected by the AI Content Automation system; content creators and the project team have the highest influence and interest.

STAKEHOLDER	ROLE IN THE PROJECT	NEEDS AND EXPECTATIONS	INFLUENCE	INTEREST
CONTENT CREATORS	Primary users who publish short videos	Publish one video to YouTube, Instagram and Facebook without manual uploads; understand why videos succeed or fail	High	High
DIGITAL MARKETERS	Secondary users who manage brand accounts	Consistent cross-posting, aggregated performance data, clear tips to improve reach	Medium	High
PROJECT DEVELOPERS	Design, build, test and document the system	Clear roles, a realistic 4-week plan, working API access, stable n8n workflow	High	High
COURSE LECTURER / EVALUATORS	Assess the project and its documentation	Complete documents, a working demo, correct use of the required tools	High	High
SOCIAL PLATFORMS (YOUTUBE, META)	Provide the APIs for publishing and analytics	Compliance with API terms, rate limits and permission review (Meta app review)	High	Low
AI PROVIDER (OPENROUTER AND ITS FREE MODELS)	Provides the model that writes the insights	Fair-use limits respected; model availability can change without notice	Medium	Low
AUDIENCE OF THE PUBLISHED VIDEOS	Viewers whose engagement is measured	Relevant, well-formatted content; their engagement data feeds the AI report	Low	Medium
